The visitor's browser

everything below runs here, nothing is sent back

1 **Forecast**
Hourly: feels-like, rain, wind, gusts, humidity, UV

2 **Day summary**
07–23 h in 9 two-hour steps

3 **Conditions**
drizzle · downpour · storm · sleet · ice · snow · gusty · muggy · fog

4 **Rule engine**
5 bands × your profile. Dress once, ≤ 4 changes

07:00 puffer
11:00 jacket
17:00 umbrella

5 **Words**
116 hand-written headlines and lines

"Rain is just the sky being clingy."

6 **The chimp**
SVG, 26 garments on one skeleton

↑ serves the page, nothing else

Stack

Next.js 16	App Router, every page prerendered
React 19 + TypeScript	strict mode
Zod	checks every forecast that comes in
SVG by hand	paths + a marker-wobble filter
CSS Modules	one tokens file for colour, line, type
Vitest · Playwright	73 unit + 44 browser tests

Where AI fits

build — **Claude Code** (Anthropic) as coding partner: plan, code, tests, review, deploy.

tested, cut — **Google Gemini Flash-Lite** as the outfit brain: worse outfits than the rules, 2–12 s waits, overload errors.

product — A hand-written **rule engine** (an expert system). No machine learning, instant, same answer every time.
